(54) Title: CARRYING HANDLE ASSEMBLY OF DRUM TYPE WASHING MACHINE

(57) Abstract: A carrying handle assembly(100) of a drum type washing machine is disclosed. The carrying handle assembly (100) has an improved structure and position of a rear-side handle(120) used in the carrying of the washing machine, thereby enabling more convenient and stable carrying of the washing machine. The carrying handle assembly(100) comprises a coupling bracket (110) to connect a top plate (10), that defines an upper surface of a machine body, to a rear plate (40) that forms a rear surface of the body, and the rear-side handle (120) provided at the coupling bracket (110) for convenient carrying of the body.
